LE TERME
DI TORRE CANNE

Accessibility Statement
Last updated: 31/07/2025
The website www.termeditorrecanne.it is committed to making its content accessible, in compliance with **Legislative Decree 106/2018**, which transposes EU Directive 2016/2102 on the accessibility of websites and mobile applications.

Compliance Status
This website is partially compliant with the accessibility requirements set by the legislation, due to certain non-compliances and/or temporary exemptions.

Actions Already Implemented:
- Integration of the **WayWidget** plugin by Iubenda for accessibility, allowing users to customize their browsing experience according to specific needs. The features include:
  - Adjusting text size, spacing, and contrast to enhance readability.
  - Activating high contrast mode and grayscale mode, useful for visually impaired users or those with perceptual disorders.
  - Highlighting links and underlining headings to facilitate navigation.
  - Keyboard-friendly navigation, designed for users with motor difficulties or who do not use a mouse.
  - Pausing animated or flashing content to prevent visual or concentration disturbances.
  - Dyslexia-friendly font, to support reading for users with learning disabilities.
  - Saving accessibility preferences to ensure a consistent personalized experience during future visits.
  - Support for compliance with the WCAG (Web Content Accessibility Guidelines), promoting inclusiveness and alignment with regulations such as the Stanca Act.

Planned Actions by December 2027:

Priority 1: High-impact fixes
• Update alternative texts (logo, linked images, duplicate images).
• Standardize link texts with identical hrefs or add explicit aria-labels.
• Remove duplicate IDs (intervention on Elementor template/menu).
• Restore visible focus (CSS outline for buttons, links, and form fields).

Priority 2: Navigation improvements
• Exclude from focus elements within hidden containers.

LE TERME
DI TORRE CANNE

• Add tabindex="0" where necessary.
• Indicate when external links open in a new tab (via text or aria-label).

Priority 3: Advanced accessibility
• Adjust color contrasts according to WCAG 2.1 AA standards.
• Add title attributes to all iFrames.
